(1) Maximum load capacity SQ on the hook with standard tooling and with a compressed air supply of minimum 0.65 MPa (6.5 bar). (2) Within certain limits, these values can be modified to suit specific requirements. (3) Values including the relevant safety factor, according to UNI EN 13001.

^{**} Subject to approval by our engineers

Air pressure 0,65 MPa (6,5 bar)

- Noise level < 70 dB(A)
- Lifting speed max 30 m/min
- Main joint axis brake
- Middle joint axis brake
- Continuous rotation on main joint
- Tool axis rotation 550°
- Slow descent in case of pressure failure
- Load balancing: standard, 1 load preset
- Flow rate during the lifting phase: 1300 NI/min
- Compressed air consuption: 118,7 NI for one complete stroke at maximum load
- Base plate size: 800 mm x 800 mm
- Colors: green RAL 6018; yellow RAL 1018
- Floor levelling required: ±2 mm/m

^{*} Hoist mode only

Compliance with the following directives:

- Essential safety requirements provided by Directive 2006/42/EC;
- Electrical Equipment Electromagnetic Compatibility (EMC) Directive 2014/30/EU.

AVAILABLE OPTIONS

- Brake for up/down movement
- Pression booster
- Special painting
- Steel platform
- Lifting height limiter stop
- Main joint rotation block
- Middle joint rotation block
- Top joint brake
- Working area sensor on main and middle joint
- Continuous swivel joint on top joint
- Load balancing: adjustment system for different load weights

WORKING ENVIRONMENT REQUIREMENTS

- Relative humidity rate: from 30% to 90% \pm 5%
- Working temperature 5 to 50 °C
- Working environment: the system must be located indoor away from outdoor elements

SAFETIES

(when assembled with tooling)

- Load loss detection;
- The system generates warning (without stopping the balancer) in order to show "out of range" working situations:
- Limitation system for the up / down lifting speed

CONFIGURATION CHART
